No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1986 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTENTS OF VOLUME 250

NUMBER 1, OCTOBER 1986

INVITED PAPER

Regulation of the Mitochondrial ATP Synthase/ATPase Complex
Klaus Schwerzmann and Peter L. Pedersen 1

COMMUNICATIONS

Fractionation by Lectin Affinity Chromatography Indicates that the Glycosylation of Most Ribonucleases in Human Viscera and Body Fluids Is Organ Specific
Katsuko Yamashita, Akira Hitoi, Masachika Irie, and Akira Kobata 263

Solubility of Palmitoyl-Coenzyme A in Acyltransferase Assay Buffers Containing Magnesium Ions *Panayiotis P. Constantinides and Joseph M. Steim* 267

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

Reductive Repression in *Escherichia coli* K-12 Is Mediated by Oxygen Radicals
R. Hertz and J. Bar-Tana 54

The Vanadate-Stimulated Oxidation of NAD(P)H by Biomembranes Is a Superoxide-Initiated Free Radical Chain Reaction
Stefan Liochev and Irwin Fridovich 139

Transformations of Arylpropane Lignin Model Compounds by a Lignin Peroxidase of the White-Rot Fungus *Phanerochaete chrysosporium*
Van-Ba Huynh, Andrzej Paszczyński, Pat Olson, and Ronald Crawford 186

Pathway of Oxidation of Pyruvic Oxime by a Heterotrophic Nitrifier of the Genus *Alcaligenes:* Evidence against Nitroethane as an Intermediate
Domenic Castignetti, Cynthia J. Forgue, and Louise A. Sclafani 228

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

25-Hydroxyvitamin D_3-23-Hydroxylase, a Renal Enzyme in Several Animal Species
G. W. Engstrom, T. A. Reinhardt, and R. L. Horst 86

The NIH-Shift in the *in Vivo* Hydroxylation of Ring-Deuterated L-Phenylalanine in Man *Wolf D. Lehmann and Hellmuth C. Heinrich* 180

Formation of Enzyme-Bound Carbanion Intermediate in the Isocitrate Lyase-Catalyzed Reaction: Enzymatic Reaction of Tetranitromethane with Substrates and Its Dependence on Effector, pH, and Metal Ions
O. P. Malhotra and U. N. Dwivedi 238

GLYCOPROTEINS AND GLYCOLIPIDS

Purification and Properties of β-Mannosyltransferase that Synthesizes Man-β-GlcNAc-GlcNAc-pyrophosphoryl-dolichol
G. P. Kaushal and Alan D. Elbein 38

Stimulation by Dolichol Phosphate-Mannose of *N*-Acetylglucosaminyl-Lipid Biosynthesis by Membranes from Class E Thy-1-Negative Mutant Mouse Lymphoma Cells Which Are Defective in Dolichol Phosphate-Mannose Biosynthesis *Edward L. Kean and Donald J. DeBrakeleer* 146

Altered Synthesis of Heparan Sulfate Proteoglycans at Low Sulfate Concentration *Bernadette Tyree, John R. Hassell, and Vincent C. Hascall* 202

Post-Translational Events in Proteoglycan Synthesis: Kinetics of Synthesis of Chondroitin Sulfate and Oligosaccharides on the Core Protein *L. Stefan Lohmander, Vincent C. Hascall, Masaki Yanagishita, Klaus E. Kuettner, and James H. Kimura* 211

HORMONE STRUCTURE AND FUNCTION

A Male Specific Hepatic Estrogen Binding Protein: Characteristics and Binding Properties *Brian J. Rogerson and Patricia K. Eagon* 70

Cleavage of the Rat Intestinal 1,25-Dihydroxyvitamin D_3 Receptor by an Endogenous Protease to a Form with Defective DNA Binding *Margaret Hirst and David Feldman* 153

LIPIDS AND PROSTAGLANDINS

Thermotropic Properties of Human Erythrocyte Membrane Proteins as Affected by Hydroxychloroaromatic Compounds *Terry L. Miller and Robert J. Smith* 128

A Comparative Study of Stearic and Lignoceric Acid Oxidation by Human Skin Fibroblasts *Harmeet Singh and Alf Poulos* 171

MEMBRANES, CELL SURFACES, AND RECEPTORS

Phosphorylation of Proteins in Human Neutrophils Activated with Phorbol Myristate Acetate or with Chemotactic Factor *Sandro Pontremoli, Edon Melloni, Franca Salamino, Bianca Sparatore, Mauro Michetti, Oliviero Sacco, and B. L. Horecker* 23

Modulation of the Lipid Composition of Boar Sperm Plasma Membranes during an Acrosome Reaction *in Vitro* *Maria Nikolopoulou, Donald A. Soucek, and James C. Vary* 30

OXYGENASES, MICROSOMES, AND *P*-450 REACTIONS

Development of Vitamin D_3 25-Hydroxylase Activity in Rat Liver Microsomes *Myrtle Thierry-Palmer, Suzanne Cullins, Shakoora Rashada, T. Kenney Gray, and Almena Free* 120

PHYSICAL BIOCHEMISTRY, MACROMOLECULAR STRUCTURE AND FUNCTION

DNA–4′-6-Diamidine-2-phenylindole Interactions: A Comparative Study Employing Fluorescence and Ultraviolet Spectroscopy *M. L. Barcellona, R. Favilla, J. von Berger, M. Avitabile, N. Ragusa, and L. Masotti* 48

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

Organization of the Pathway of *de Novo* Pyrimidine Nucleotide Biosynthesis in Pea (*Pisum sativum* L. cv Progress No. 9) Leaves *Holly D. Doremus* 112

PROTEIN STRUCTURE AND FUNCTION

Rapid Purification of Adenylate Kinase from Human Erythrocytes and Skeletal Muscle *Daniel A. Nealon* 19

The Isolation and Properties of Multiple Forms of Folate Binding Protein in Cultured KB Cells *Carol A. Luhrs, Easwara Sadasivan, Maria da Costa, and Sheldon P. Rothenberg* 94

Human Prothymosin α: Amino Acid Sequence and Immunologic Properties *Lu-Xing Pan, A. A. Haritos, J. Wideman, T. Komiyama, May Chang, S. Stein, S. B. Salvin, and B. L. Horecker* 197

Cooperative Cluster Formation in Metallothionein *Jonathan Byrd and Dennis R. Winge* 233

Isolation and Amino Acid Sequence of Bovine Platelet Factor 4 *Raymond E. Ciaglowski, June Snow, and Daniel A. Walz* 249

Isolation and Identification of a 23,000-Dalton Heparin Binding Fragment from the Amino Terminus of Bovine Thrombospondin *Martha Aiken, Raymond E. Ciaglowski, and Daniel A. Walz* 257

PROTEIN TURNOVER, PROTEOLYSIS, AND POST-TRANSLATIONAL PROCESSING

Isolation and Partial Characterization of Rat Elastolytic Enzymes from Various Cells and Tissues *Concetta Gardi and Giuseppe Lungarella* 63

Activation of Human Erythrocyte 2,3-Bisphosphoglycerate Phosphatase at Physiological Concentrations of Substrate *C. Hugh Reynolds* 106

Translational Initiation Factors from Sea Urchin Eggs and Embryos: Functional Properties Are Highly Conserved *Alina C. Lopo, Coralie C. Lashbrook, Dzintra Infante, Anthony A. Infante, and John W. B. Hershey* 162

NUMBER 2, NOVEMBER 1, 1986

COMMUNICATION

Superoxide Dismutase and Catalase in the Murine Malaria, *Plasmodium berghei:* Content and Subcellular Distribution *Alexandra S. Fairfield, John W. Eaton, and Steven R. Meshnick* 526

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

Purification and Characterization of NADH Dehydrogenase Complex from *Paracoccus denitrificans* *Takao Yagi* 302

Heparin-Activated Protein Kinase from Rabbit Muscle: Relationship to Enzymes of the Glycogen Synthase Kinase-3 Category *Zafeer Ahmad, Fook-Thean Lee, Anna A. DePaoli-Roach, and Peter J. Roach* 329

Spectroscopic Studies on Heme d in the Visible and Infrared *Mark R. Vavra, Russell Timkovich, Flordeliza Yap, and Robert B. Gennis* 461

The Modes of Action of Long Chain Alkyl Compounds on the Respiratory Chain-Linked Energy Transducing System in Submitochondrial Particles *N. Batayneh, S. J. Kopacz, and C. P. Lee* 476

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

Effect of Glycerol on Thermolysin-Catalyzed Peptide Bond Synthesis
Ian Durrant, Robert J. Beynon, and Paul B. Rodgers 280

Substrate Size Dependence of Lysozyme-Catalyzed Reaction
Tamo Fukamizo, Takeya Minematsu, Yugi Yanase, Katsuya Hayashi, and Sachio Goto 312

Potassium Activation and Its Relationship to a Highly Reactive Cysteine Residue in Fructose 1,6-Bisphosphatase
E. Hubert, A. Ojeda, A. Reyes, and J. C. Slebe 336

Electron Transfer between Reduced Methyl Viologen and Oxidized Glutathione: A New Assay of *Saccharomyces cerevisiae* Glutathione Reductase
Antonio Llobell, Victor M. Fernandez, and Juan López-Barea 373

Conversion of Purines to Xanthine by *Methanococcus vannielii*
Edward DeMoll and Lin Tsai 440

The Enzymic Synthesis of Ribose-1,5-bisphosphate: Studies of Its Role in Metabolism
Sujit K. Guha and Zelda B. Rose 513

GLYCOPROTEINS AND GLYCOLIPIDS

Gangliosides Indirectly Inhibit the Binding of Laminin to Sulfatides
David D. Roberts, Lance A. Liotta, and Victor Ginsburg 498

HORMONE STRUCTURE AND FUNCTION

Studies on the Role of 1,25-Dihydroxyvitamin D in Chick Embryonic Development
Leslie E. Hart, Heinrich K. Schnoes, and Hector F. DeLuca 426

LIPIDS AND PROSTAGLANDINS

Highly Unsaturated Phospholipid Molecular Species of Rat Erythrocyte Membranes: Selective Incorporation of Arachidonic Acid into Phosphoglycerides Containing Polyunsaturation in Both Acyl Chains
Mitchell Robinson, Merle L. Blank, and Fred Snyder 271

Phospholipid Base Exchange in Human Leukocyte Membranes: Quantitation and Correlation with Other Phospholipid Biosynthetic Pathways
Yukie Niwa and Shinkichi Taniguchi 345

Effect of Fatty Acid Supplementation on Thermotropic Behavior of Membrane Lipids and Leucine Transport in *Saccharomyces cerevisiae*
Joyoti Basu, Manikuntala Kundu, and Parul Chakrabarti 382

Diacylglycerol Metabolism in Phospholipase C-Treated Mammalian Cells
Claudia Kent, Abigail Evers, and Shirley S. L. Haun 519

MOLECULAR BIOLOGY, GENE EXPRESSION AND DEVELOPMENTAL BIOCHEMISTRY

Lipovitellin Inhibition of *Artemia* Trypsin-like Proteinase: A Role for a Storage Protein in Regulating Proteinase Activity during Development
Begoña Ezquieta and Carmen G. Vallejo 410

Identification of Two Forms of Glycogen Phosphorylase in *Dictyostelium*
Charles L. Rutherford and Michel J. Cloutier 435

OXYGENASES, MICROSOMES, AND *P*-450 REACTIONS

Depression of Cytochrome *P*-450 and Alterations of Protein Metabolism in Mice Treated with the Interferon Inducer Polyriboinosinic Acid · Polyribocytidylic Acid *Nigel J. Gooderham and Gilbert J. Mannering* 418

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

Enrichment of a 50-Kilodalton Polypeptide in a Photosystem II–Phycobilisome Particle from *Porphyridium cruentum* *Barbara M. Chereskin and Elisabeth Gantt* 286

Purification and Characterization of Mandelonitrile Lyase from *Prunus lyonii* *Lang-Lai Xu, Bijay K. Singh, and Eric E. Conn* 322

Purification and Characterization of Benzoyl-L-Arginine *p*-Nitroanilide Hydrolase from Etiolated Leaves of *Zea mays* *Michio Doi, Yuzo Shioi, and Tsutomu Sasa* 358

The Role of Chalcone Synthase in the Regulation of Flavonoid Biosynthesis in Developing Oat Primary Leaves *Wolfgang Knogge, Elmon Schmelzer, and Gottfried Weissenböck* 364

PROTEIN STRUCTURE AND FUNCTION

Alcohol-Induced Conformational Changes of Ubiquitin *Keith D. Wilkinson and Alan N. Mayer* 390

Purification and Characterization of a Glycogen Phosphorylase Analog Missing the Amino-Terminal Segment *William R. Harris, Joyce F. Miller, and Donald J. Graves* 446

The Redox Centers of Xanthine Oxidase Are on Independent Structural Domains of the Enzyme *M. B. Nichols and Philip S. Low* 488

Cryoprotection of Phosphofructokinase with Organic Solutes: Characterization of Enhanced Protection in the Presence of Divalent Cations *John F. Carpenter, Steven C. Hand, Lois M. Crowe, and John H. Crowe* 505

PROTEIN TURNOVER, PROTEOLYSIS, AND POST-TRANSLATIONAL PROCESSING

Role of Ubiquitin Conformations in the Specificity of Protein Degradation: Iodinated Derivatives with Altered Conformations and Activities *M. Jane Cox, Arthur L. Haas, and Keith D. Wilkinson* 400

Import and Processing of $P\text{-}450_{scc}$ and $P\text{-}450_{11\beta}$ Precursors by Corpus Luteal Mitochondria: A Processing Pathway Recognizing Homologous and Heterologous Precursors *Martha F. Matocha and Michael R. Waterman* 456

REGULATION OF METABOLISM AND OF ENZYME ACTION

Phosphorylation of Rabbit Skeletal Muscle Glycogen Synthase by Casein Kinase 1: Evidence of Phosphorylation Sites Specific for Casein Kinase 1 *Maria D. Guasch, Maria Plana, Jordi Vila, and Emilio Itarte* 294

Activation of Hepatocyte Glycogen Synthase by Metabolic Inhibitors *Assumpta Carabaza, Joan J. Guinovart, and Carlos J. Ciudad* 469

AUTHOR INDEX FOR VOLUME 250 530

The Subject Index for Volume 250 will appear in the December 1986 issue as part of a cumulative index for the year 1986.

Instructions to Authors[1]

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Short Communications** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Short Communications offer a means of early publication of work of such importance that rapid publication is warranted. They should not exceed 15 double-spaced typed manuscript pages in length (including text, bibliography, tables, and figures). To expedite review and processing of communications, authors may send them directly to an Executive Editor most closely associated with the subject category of the communication. Communications sent to the Editorial Offices of the journal (see below) will be assigned to an Executive Editor.

Manuscripts should be written in clear, concise and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of figures, to:

Archives of Biochemistry and Biophysics
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. Normally they should not exceed 15 manuscript pages in length (including text, bibliography, tables, and figures). The review and printing of such papers will be expedited to provide earliest possible publication.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in

---

[1] An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC–IUB rules and recommendations, and accepted abbreviations.

the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet: footnotes to tables should be identified by superscript lowercase italic letters (^{a,b}, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. Line drawings should be professionally drafted and no larger than 8.5 × 11 in. Letters and numbers should be at least $^{3}/_{16}$ in. (4 mm) in height (Leroy lettering size 200). Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1985. Please note the following examples.

1. Jones, J. B., Dilworth, G. L., and Stadtman, T. C. (1979) *Arch. Biochem. Biophys.* **195,** 255–260.
2. Metzler, D. E. (1977) Biochemistry: The Chemical Reaction of Living Cells, p. 298, Academic Press, New York.
3. Harrington, W. F. (1979) *in* The Proteins (Neurath, H., and Hill, R. L., eds.), Vol. 4, pp. 246–409, Academic Press, New York.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.
